How much does Donarius cost?
And how does the pricing model work?

Donarius® has a base version ($63.97 US or $67.97 CAD) and various optional modules ($16.50 US or $18.00 CAD), each of which can be purchased separately. Each price shown below is a low one-time cost. This means there are no monthly or yearly fees.

Base Version:

The base version costs $63.97 US ($67.97 CDN) and does this:

- tracks donors
- tracks donations
- prints tax receipts using built-in styles (They have a several options for how you want them to appear.)
- prints either yearly receipts or one with each donation
- prints a variety of reports
- prints mailing labels
- imports data
- exports data

Small churches and organizations get 25% off.
=> $47.98 US or $50.98 CAD for the base version
and $12.37 US or $13.50 CAD for each module.

You are entitled to this discount if you have a maximum of 100 active donors per year.
When you grow bigger, just pay the difference.
The number of active donors per year is defined as:
(# who donated twice or more within the last six months)
+ (# of all others who donated within the last year) / 10

For example: suppose you have 190 donors who give per year,
90 of them give more than once every six months and
the other 100 give once every six months or less often,
then you would have only 100 active donors
(90 + 100 / 10 = 100)

The available modules are described below and cost an additional $16.50 US or $18.00 CAD each.

Modules:

Pledge Tracking:
This module records each pledge that a donor makes. For example a three year pledge to be given quarterly. Pledged amounts can be given annually, semi-annually, quarterly, monthly, weekly or twice a month. When you do your tax receipts you have the option of showing the amount pledged as well as the actual amount given. You can also do this on quarterly statements. A variety of pledge reports are available. You will be able to mail (or email) a reminder letter to donors who fall short on their pledges.

Track Pre-authorized Deposits (P.A.D. or A.C.H.) / Online Donations:
Pre-authorized deposits (P.A.D. or A.C.H.) are amounts that are withdrawn from a donor's bank account and deposited directly into your organization's bank account. This is done at various frequencies depending on what the donor wants. It could be once a month, twice a month, every two weeks (bi-weekly) or once a week. This module keeps track of these. You set up the the P.A.D. for the donors that wish to use it and Donarius® will automatically enter their donations on the correct date.

Donarius also processes your online donations. It is integrated with NuverbPay. You can also import from PayPal, Vanco, WeShare, Moonclerk, Givelify, Bambora, Tithe.ly, Txt2Give and others in a few steps.

Track "Gifts in Kind" and Gifts with an Advantage:
"Gifts in Kind" are gifts of property rather than any form of money. (i.e. non-monetary donations) Receipts for income tax purposes for "gifts in kind", will include the following:

The fair market value of the property at the time the gift was made.
The date of the gift.
A description of the property.
The name and address of the appraiser (if any) of the property.

"Gift in Kind" tax receipts can have zero value and still count toward fulfilling a pledge.

Gifts in which the donor received something in return for their donation are "gifts with an advantage" or split receipts. For example, suppose a charity charges an annual $120 membership fee, gives a key chain to its members valued at $10 and offers discounts to its members worth $10, the total advantage received by the donor would be $20. Therefore, the tax receipt for the donation would only have $100.

Design and Print Customized Tax Receipts:
Donarius® has several built-in receipt styles to choose from. They have several options for how you want them to appear. For example, you can add items to the bottom part of a tax receipt, such as a year-to-date summary by quarter, or a detailed listing of every donation. You can also include a logo or a scanned signature. If these options are not

enough for you then the *Custom Receipt* module lets you design your own receipts so that they can:

a) have items placed wherever you want
b) include several graphics files
c) have a personalized letter of any length
d) have different font styles and sizes
e) include any field from the donor database
f) be personalized for different donor types, donor characteristics, payment methods, etc.

If you also get the "Gift in Kind" module then those receipts can be customized too.

We will setup one customized tax receipt, letter or email for you at no charge. Additional ones are $20.00 each.

Print Personalized Letters and Send Personalized Emails/Messages (with app):
To keep your donors informed about your church/organization you should send them personalized letters, emails or messages (with app). This module lets you setup the letters, emails and messages that you want to send out. When you are ready to send them out, you tell Donarius® which donors you want to send them to. There are a variety of criteria you can select. For example, you can select donors based on whether they did or did not give in a certain date range to certain donation categories. For each donor you also specify how they prefer to be contacted. (ie. by letter, email or message) Only those donors who want a letter will get one and only those who prefer getting an email or message will get one. You will be able to preview each before sending it out. Then you can print your letters or send out your emails/messages.

To email your tax receipts as PDF files you need this module.

You can also print your own offering envelopes with this module.

We will setup one customized tax receipt, letter or email for you at no charge. Additional ones are $20.00 each.

You could also send personalized letters using the base version as follows:

do a report showing the donors you want to send a letter to
export the names and addresses of the donors in the report
start your word processor
do a mail merge with the data you exported

Relationships and Families:
This helps you keep track of various relationships between donors, such as:

- Family relationships (parent/child, husband/wife)
- Someone is sponsoring someone else.

- One person is praying for someone.
- A person is in authority over another (eg: manager, elder, small group leader)

You can also record anniversaries and do a mailing to any couple with an anniversary coming up.

Photo Directory:
Store individual and family photos of each person. This makes it easy to print a color photo directory. (Sometimes also called a picture directory or pictorial directory.) Without this module you can still print a directory without any images.

Purchasing the Software:

You can pay by:
Placing an order online
Calling in your credit card number
Mailing a check

Upgrades:

The software includes one year of free updates and support. After that if you want the latest version there is an upgrade cost that is based on the difference between the version # you have **"paid up to"** and the version # you are upgrading to. (The **"paid up to"** version is the version number of the software you originally purchased or that you last upgraded to.) To determine the approximate cost to upgrade, check how many years you have been using the software since your original purchase or your last upgrade. You would pay the percentage shown in the chart below.

How many years have you been using the software?	Approximate cost as a % of the full price
<1 year	Free Updates
1 year	20 %
1.5 years	30 %
2 years	40 %
2.5 or more years	50 %

If you want to have continuous support, you can be automatically billed each year for an upgrade.

Licensing Policy:

With your purchase you are allowed to install Donarius on as many computers as you want for no extra charge. However, if you track donations for several different organizations, you must purchase a copy for each organization. Each copy may have different modules or discounts so you would pay the full price for the highest priced one

and get a 75% discount on each of the additional copies. (i.e. only 1/4 of the price for each additional one)

Demo Version:

The demo version has all the modules so you can evaluate them to decide which ones you want.

Note: The demo version has these limitations:

- prints sample tax receipts not official ones
- prints 1 sample directory at a time
- exports only 10 donors or donations at a time
- sends only 1 email at a time.
- you have 30 days to enter new donors or new donations
